

Ventana Audio

```
graph LR; A[Ventana Audio] --> B((Subtractor de Fondo)); B --> C[Fondo]; B --> D[No Fondo]; D --> E[Integración Temporal]; E --> F[Detección Sirenas];
```

The diagram illustrates a sequential process for siren detection. It begins with an input box labeled 'Ventana Audio' (pink), which feeds into a central circular node labeled 'Subtractor de Fondo' (green). From this node, two arrows branch out to 'Fondo' and 'No Fondo' (both pink). The 'No Fondo' path then leads to 'Integración Temporal' (green), which finally leads to 'Detección Sirenas' (green).
